

# CanBusLine 2 GSM pager

## CANBUSLINE2 car alarm with integrated GSM-transmitter

...for the original remote of the car

transmits alarm-SMS to the mobile of the car...

**universally suitable** for most of the new car models of:

Alfa Romeo, Audi, BMW, Chevrolet, Citroen, Fiat, Ford, Honda, Infinity, Lancia, Landrover, Lexus, Mercedes, Mini, Mitsubishi, Nissan, Opel, Peugeot, Porsche, Seat, Skoda, Toyota, Volvo, VW

By means of 2 selector screws the car alarm will be adjusted to the car model..

**Only 4 wires (battery and CANBus) up to maximum 7 wires must be connected for the alarm functions (30 – 90 minutes)**

- ★ **guarding doors, bonnet, trunk, shocks, ignition,....** and the voltage level of the **car-battery**
- ★ **alarm signals:** indicator lights and (excludable) horn or siren as well as **SMS-message** to a mobile phone or....
- ★ **Indicator lights confirm** that car alarm is switched on, off...
- ★ .... and, if desired, **beep-signals** confirm this, too
- ★ **pin-code** (personal number-code) can switch off the car alarm in case of emergency (loss of remote control) by ignition on/off
- ★ **alarm memory** indicates via LED the cause of alarm
- ★ **taxi-alarm features** are possible additionally

Besides there can (but must not) be connected:-:

- ★ **immobilizer-wires** (interrupting engine electrics)
- ★ **additional sensors:** ultrasonic, micro-wave, anti-lift....
- ★ **additional siren with battery back-up** for alarm signals

### ★ **SMS-alarm** (GSM-feature)

Additionally to the normal alarm signals (horn, siren, indicator lights), the CANBUSLINE2-GSM-device can also transmit alarm messages:

- by dialing a mobile phone with 3 times ringing, and...
- transmitting then a SMS (to the same phone number) indicating the cause of alarm:

**alarm by shock**  
**alarm by key**  
**alarm by ultrasonic**  
**alarm by door**  
**alarm by bonnet**  
**alarm by aux**

If alarm is triggered, this alarm sequence warns once, and each time alarm is triggered again it will warn anew once.

### ★ **car battery guarding** (GSM-feature)

If the voltage level of the car battery drops below 11V for more than one minute, the following SMS is transmitted to the car-owner:

**low battery**

### ★ **taxi-alarm signals** (horn/siren, indicator lights, beams)

...the driver can trigger by means of a push-button, and these infinite signals must be switched off by a second push-button.
