

List of car models and  
 analoge signal outputs  
 of the universal  
**CANBus-signal-converter  
 8H (B2S-8H)**

- S** = Speed pulses
- L** = Lower beams
- I** = Ignition plus
- R** = Reversing signal
- E** = Engine r.p.m.
- O** = b, c, e or ....
- o** = optionally to be specified
- o** = optionally to be specified

NOTES 1041.8  
 a = my be delayed by CanBus-priorities (green wire)  
 b = parking brake (grey wire)  
 c = engine run (grey wire)  
 d = switched by light dim (yellow wire)  
 e = reversing signal (grey wire)  
 f = depends on CanBus-configuration (white wire)  
**S = special interface required (and available)**  
**CAN-C = highspeed "engine"-CanBus**  
**CAN-B = lowspeed "comfort"-CanBus**

**S = special interface for this car model available only on request**

NOTE: Customized (beside standard) interfaces are available on request.

NOTE: It may be possible that the car manufacturer modifies the CanBus-protocols of a certain car model during maintenance or call-back occasions.

NOTE: If, despite of utmost care having been applied, this listing should contain any printing errors or mistakes, we beg to excuse this as well as to understand that we object to any liability for them.

NOTE: When installing this interface, all our advises, and all instructions and regulations of the car manufacturer, of the handicraft concerned, of the governmental authorities must be strictly observed.
