

GPS *auto* Cam 1 G

VIDEO - AUDIO - G-SENSOR - GPS-POSITION
automotive driving recorder (with integrated PC-software)

camera fixed at the windscreen
records continuously
as long as powered by 12V /24V

flash back-up onto USB stick
can extend internal 1 GB memory

In case of accident or sharp braking, rapid curving... triggered by adjustable G-thresholds (or if triggered manually) the recordings of the last and next 20 seconds each are stored in a file together with time and date, which can be easily identified and analysed later on.

autoCam connected (by USB) to a PC

E11 10R - 03 5121
ECE type approval

integrated *auto*Cam-software enables
to analyse directly on PC the recorded files

*auto*Cam can support driver's safety and driving efficiency,
fleet management, insurance claim and accident reasoning....

It can monitor driver's behavior.
It can help to rebut fraudulent claims.
Or it 's used to improve own driving.
